

4. RELACIÓN DE ESPECIES Y SUBESPECIES

SPHECINAE

SCELIPHHRINI

Sceliphron destillatorium (Illiger, 1807)

Sceliphron madraspatanum tubifex (Latreille, 1809)

Sceliphron spirifex (Linnaeus, 1758)

SPHECINI

Sphex pruinosus Germar, 1817

Sphex rufocinctus Brullé, 1832

Isodontia splendidula (Costa, 1858)

Palmodes occitanicus ibericus (Roth, 1963)

Prionyx kirbii (Vander Linden, 1827)

Prionyx nudatus (Kohl, 1885)

Prionyx subfuscatus (Dahlbom, 1845)

AMMOPHILINI

Podalonia hirsuta (Scopoli, 1763)

Podalonia tydei senilis (Dahlbom, 1843)

Ammophila heydeni Dahlbom, 1845

Ammophila hungarica Mocsary, 1883

Ammophila laevicollis André, 1886

Ammophila sabulosa (Linnaeus, 1758)

PEMPHREDONINAE

PSENINI

Mimumesa unicolor (Vander Linden, 1829)

Psenulus pallipes (Panzer, 1798)

PEMPHREDONINI

Diodontus hyalipennis Kohl, 1892

Diodontus minutus (Fabricius, 1793)

Pemphredon lethifera (Shuckard, 1837)

Passaloecus gracilis (Curtis, 1834)

Passaloecus singularis Dahlbom, 1844

Spilomena mocsaryi Kohl, 1898

ASTATINAE

ASTATINI

Astata apostata Mercet, 1910

Astata boops (Schranck, 1871)
